We invite you to participate in the **Harvey Rural Transportation Study Survey!** The purpose of this study is to identify current and future transportation needs of the Harvey community and the role that transit service and/or community-based micro-mobility (e.g. carpool matching technology, ridesharing and carsharing) can play in meeting those needs. The input gathered from the online survey will be critical to providing insight into the current transportation options offered in Harvey and identify opportunities that can be used to develop future transit projects.
